

Nine Topics.

Yousry Mahmoud Atlm · Chairman · Investor · Company Builder

Each topic draws on a record already on the public file — the nine sectors set out on the Impact page — and is offered as a keynote, a board session, or a closed-door briefing.

01 From Venture to Public Market in Three Years

The complete listing sequence — NILEX, capital increase, Main Market graduation — and the governance decisions taken before any of it was possible.

Founders · boards · capital-markets audiences

02 Modernizing a Nation's Networks

Two decades inside every major upgrade of a national connectivity backbone: legacy exchange migration, fiber, and an FTTH buildout reaching roughly half a million families.

Operators · regulators · infrastructure investors

03 Designing the Digital Nervous System of a City

Telecommunications design, feasibility modelling and revenue planning for a flagship smart-city build — decided before construction begins.

Government · urban development · smart-city programmes

04 Grid Intelligence Before It Was Standard

Leading a national smart-grid and smart-metering programme across ministries, and what cross-ministry delivery structures actually require.

Utilities · energy ministries · industrial partners

05 Import Substitution as Private-Sector Doctrine

Localizing strategic technology through three distinct vehicles — components, electronics, AI infrastructure — rather than by decree.

Industrial policy · manufacturers · development finance

06 Sovereign-Scale Financing Without Sovereign Debt

How national infrastructure can be funded through structures that carry no sovereign-debt obligation, and what that asks of the private executor.

Ministries · development banks · institutional investors

07 Talent Engineered Like Infrastructure

Building a national digital-talent pipeline with universities, employers and ministries — and why infrastructure without talent is idle capacity.

Universities · ministries of education and labour · employers

08 Redesigning How Enterprises Operate in the AI Era

From a global operating-model mandate to AI-era organizational development for chairmen and boards: operating models decay faster than strategies.

Chairmen · boards · C-suites

09 The EDGE™ Framework

Establish, Develop, Grow, Exit — the four stages, the gates between them, and the case evidence from venture to public market.

Boards · founders · investors · executive programmes

Engage

Speaking Engagements

Value creation, AI-era leadership, or the EDGE™ Framework.

Media Interviews

Broadcast and press enquiries — biography, positions, and media assets.

Investment Discussions

Institutional and family-office enquiries via EDGE Capital.

Board & CEO Advisory

Structured advisory for chairmen, boards and C-suites through EDGE Advisory.

Strategic Partnerships

Infrastructure, localization and technology partnerships across the GCC and Egypt.

EDGE AI Boardroom Forum

Request membership or convening details.
